Vision and mission

We are the first choice in providing integrated solutions of the future for the energy and water sectors.

We create technologies to support customers in the responsible and sustainable management of energy utilities and water.

Values of the Company

Responsibility

- we keep our word
- we always provide products and services in the quality and time expected by our clients, partners and associates
- we are fully involved in the undertaken actions

Cooperation

- we are a team
- we openly and closely cooperate to achieve the organization's goals
- we respect our partners and associates

Development

- we actively seek for and implement new solutions and breakthrough innovations
- we constantly develop our competencies

Agility

- we are open to changes
- we cleverly and efficiently adapt our actions to the needs of the market and organization
